Prevention of Shaken Baby Syndrome and Abusive Head Trauma Policy

Belief Statement

We, Pilot Baptist Daycare Ministry, believe that preventing, recognizing, responding to, and reporting shaken baby syndrome and abusive head trauma (SBS/AHT) is an important function of keeping children safe, protecting their healthy development, providing quality child care, and educating families.

Background

SBS/AHT is the name given to a form of physical child abuse that occurs when an infant or small child is violently shaken and/or there is trauma to the head. Shaking may last only a few seconds but can result in severe injury or even death¹. According to North Carolina Child Care Rule (child care centers, 10A NCAC 09 .0608, family child care homes, 10A NCAC 09 .1726), each child care facility licensed to care for children up to five years of age shall develop and adopt a policy to prevent SBS/AHT².

Procedure/Practice

Recognizing:

- Children are observed for signs of abusive head trauma including irritability and/or high-pitched crying, difficulty staying awake/lethargy or loss of consciousness, difficulty breathing, inability to lift the head, seizures, lack of appetite, vomiting, bruises, poor feeding/sucking, no smiling or vocalization, inability of the eyes to track and/or decreased muscle tone. Bruises may be found on the upper arms, rib cage, or head resulting from gripping or from hitting the head.

Responding to:

- If SBS/ABT is suspected, staff will:
 - o Call 911 immediately upon suspecting SBS/AHT and inform the director. o Call the parents/guardians.
 - If the child has stopped breathing, trained staff will begin pediatric CPR⁴.

Reporting:

- Instances of suspected child maltreatment in child care are reported to Division of Child Development and Early Education (DCDEE) by calling 1-800-859-0829 or by emailing webmasterdcd@dhhs.nc.gov.
- Instances of suspected child maltreatment in the home are reported to the county Department of Social Services. Phone number: (919) 496-5721.
- **Prevention strategies to assist staff* in coping with a crying, fussing, or distraught child**
Staff first determine if the child has any physical needs such as being hungry, tired, sick, or in need of a diaper change. If no physical need is identified, staff will attempt one or more of the following strategies:
 - Rock the child, hold the child close, or walk with the child.
 - Stand up, hold the child close, and repeatedly bend knees.
 - Sing or talk to the child in a soothing voice.
 - Gently rub or stroke the child's back, chest, or tummy.
 - Offer a pacifier or try to distract the child with a rattle or toy.
 - Take the child for a ride in a stroller.
 - Turn on music or white noise.

In addition, the facility will:

- Allows for staff who feel they may lose control to have a short, but relatively immediate break away from the children.
- Provides support when parents/guardians are trying to calm a crying child and encourage parents to take a calming break if needed.

Prohibited behaviors

Behaviors that are prohibited include (but are not limited to):

- shaking or jerking a child
- tossing a child into the air or into a crib, chair, or car seat
- pushing a child into walls, doors, or furniture

Strategies to assist staff members understand how to care for infants

Staff reviews and discusses:

- The five goals and developmental indicators in the 2013 North Carolina Foundations for Early Learning and Development, ncchildcare.nc.gov/PDF_forms/NC_Foundations.pdf
- How to Care for Infants and Toddlers in Groups, the National Center for Infants, Toddlers and Families, www.zerotothree.org/resources/77-how-to-care-for-infants-and-toddlers-in-groups
- Including Relationship-Based Care Practices in Infant-Toddler Care: Implications for Practice and Policy, the Network of Infant/Toddler Researchers, pages 7-9, www.acf.hhs.gov/sites/default/files/opre/nitr_inquire_may_2016_070616_b508compliant.pdf

Strategies to ensure staff members understand the brain development of children up to five years of age: All staff take training on SBS/AHT within the first two weeks of employment. Training includes recognizing, responding to, and reporting child abuse, neglect, or maltreatment as well as the brain development of children up to five years of age. Staff review and discuss:

- Brain Development from Birth video, the National Center for Infants, Toddlers and Families, www.zerotothree.org/resources/156-brain-wonders-nurturing-healthy-brain-development-from-birth
- The Science of Early Childhood Development, Center on the Developing Child, developingchild.harvard.edu/resources/inbrief-science-of-eed/
